Regional Gas Price Inflation		0.089** (0.041)						

Standard errors in parentheses.

Note: Each column includes time fixed effects. All means refer to within-subject means. Model (1) is unaltered. Model (2) includes gas price inflation and regional controls. Model (3) includes the lagged inflation expectation and lagged inflation uncertainty and their interactions with the no college indicator. Model (4) includes the interactions of the unemployment expectations indicators with the no college indicator. Model (5) restricts to the overlap sample between the durables and nondurables samples. Model (6) restricts to households in the durables sample with more than 5 observations. Model (7) excludes months with outlier median inflation expectations: June 2010, March 2011, September 2011, February 2012. Model (8) excludes observations from 2009, in which the durable sample's spending patterns were most different from the CES. The full set of coefficients is presented in Table A15. Robust standard errors are clustered at the level of the individual respondent.

Standard errors in parentheses.

Note: Each column includes time fixed effects. All means refer to within-subject means. Model (1) is unaltered. Model (2) includes gas price inflation and regional controls. Model (3) includes the lagged inflation expectation and lagged inflation uncertainty and their interactions with the no college indicator. Model (4) includes the interactions of the unemployment expectations indicators with the no college indicator. Model (5) restricts to the overlap sample between the durables and nondurables samples. Model (6) restricts to households in the durables mortgage sample with more than 5 observations. Model (7) excludes months with outlier median inflation expectations: June 2010, March 2011, September 2011, February 2012. Model (8) excludes observations from 2009, in which the durable sample's spending patterns were most different from the CES. The full set of coefficients is presented in Table A18. Robust standard errors are clustered at the level of the individual respondent. * $p < 0.10$, ** $p < 0.05$, *** $p < 0.01$
